- Bin Transfer

NetScore WMS Mobile for NetSuite

Benefits

Compatible with iOS and Android Devices

Supports iOS and Android devices. Works with your barcode scanners and wireless printers along with square readers.
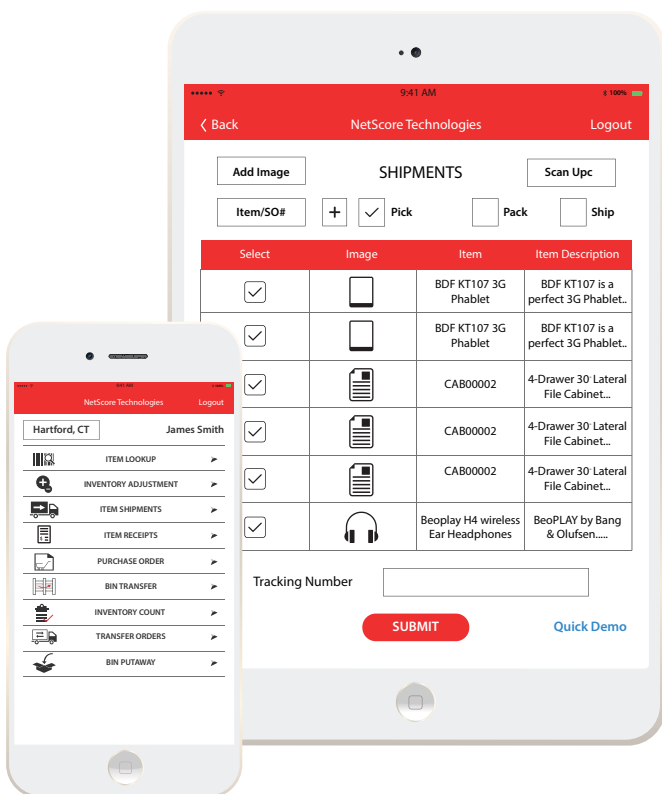

Improve Order Accuracy

Ensures that the correct items are fulfilled and received. Eliminates manual entry of Lot and Serial numbers.

Increase Employee Efficiency

Eliminates multiple manual steps and makes it a single step scanning process to improve both efficiency and productivity.

Quick Installation

Installs quickly from the Apple App Store and Google Play Store. Setup is easy and user-friendly. You will be up and running in minutes.

Features

NetScore WMS Mobile supports items with or without bins and serial & lot numbered items. The app works well in your warehouse with a full complement of features that include:

Warehouse Operations

- **Shipments (Pick, Pack & Ship)**

  Provides an efficient way of shipping inventory out of your warehouse with pick, pack and ship functionality. Orders can be picked based on item or order. Shipping Labels can also be generated for easy accessibility.

- **Item Receipts**

  Provides fast and efficient way of receiving inventory (from Purchase orders, Transfer Orders and Customer Returns) into your warehouse. Item labels can be printed after receiving the inventory. For bin items, inventory can be received to a default bin.

- **Inventory Adjustments**

  Manage your inventory in different locations from anywhere at any time. Our approval process for inventory adjustment will provide additional validation before posting the adjustment.

- **Inventory Count**

  Simultaneously runs inventory count and inventory management (receiving & shipping process). Supports approval for inventory count.

- **Bin Transfers**

  Helps the user to quickly transfer the bin quantity between bins of the same location. Auto allocation of bins can be done based on predefined rules.

- **Bin Put Away**

  Auto allocation of preferred bin or bulk allocation of bins for items can be done along with the standard process of Bin Put Away.

- **Item Lookup**

  Provides an in-depth overview of your inventory in real-time and insights into your stock of items.
