

# NetScore Subscription Billing

Built for  
**ORACLE**  
NETSUITE   
Native SuiteApp

## For NetSuite

NetScore Subscription Management provides a powerful solution for companies who need to manage recurring sales order transactions. NetScore Subscription Management is built native to the NetSuite platform providing a seamless extension to the customer's ERP solution. The billing engine automatically creates incremental invoices to simplify the billing process. Entered as a single transaction, the subscription agreement defines the subscription item, frequency of the shipments / invoices, duration of the subscription, discounts, and payment methods.

**“ NetScore Knows What They Are Doing!**  
Our company needed software to handle our recurring billing associated with subscription plans and I was lucky enough to come across NetScore. The software off the shelf met 90% of our needs, but they did a great job at customizing it to be exactly what we needed. Their engineers and support staff have been great to work with and I could not recommend them more! ”
