

NetScore GridOrder Management

For NetSuite

Built for
**ORACLE®
NETSUITE**

Native SuiteApp

NetScore's GridOrder Management for NetSuite allows users to easily select matrix items on transactions for multiple company locations and price levels without entering each item separately. Quantities are updated quickly leading to a decrease in processing time while improving efficiency by more than 50 percent.

Benefits

Custom Price Flexibility

Supports customer price levels and custom price flexibility.

Customizable Special Features

Customizable for special features like line level location (multi-location) and multi-subsidiary support.

Easy Setup

Includes one-time setup and an easy-to-use interface.

Standard and Custom Forms

Available for both standard and custom forms.

Real-time Visibility

Provides real-time visibility of inventory on hand.

"With NetScore, our net increase in headcount was zero for the launch of a business that now makes up 15 percent of our revenue — and we don't have to work 12 to 14 hour days. When you're a consumer products company with a very rapid rate of growth, anything you can do to improve the efficiency of the few resources you have is like gold."

Dorothy Sadd | Chief Operating Officer
MANDUKA, LLC

Features

Drives Better Buying Decisions

Improves buying decisions by providing insight into inventory levels for each company location.

Reduces Processing Time

Reduces the sales order and purchase order processing time, leading to increased productivity.

User Friendly

Simple user interface makes it easy to use. Users can easily add, edit or remove items.

Avoid Separate Entry of Items

Avoid the hectic manual task of entering child matrix items separately.

Add Multi-Child Items

Allows a user to add multi-child items of various parent items.
