

# NetScore TS Mobile

For NetSuite

## NetScore Trade Show Mobile for NetSuite

transforms small to midmarket retail companies with cloud technology that streamlines sales and inventory management. The application, seamlessly integrated with the industry-leading NetSuite ERP cloud platform, improves customer satisfaction.

## Powerful Inventory Management & Mobile Flexibility

NetScore Trade Show Mobile is a groundbreaking mobile app that combines leading technologies such as NetSuite and Apple iPad®/ iPhone® to create an innovative solution that delivers both powerful inventory management and mobile flexibility. NetScore Trade Show Mobile turns an ordinary tablet or smartphone into a robust mobile barcode scanner that is directly connected to your inventory and sales data across your entire enterprise - all in real-time.

## Benefits

### Compatible with iOS and Wireless Devices

Works with your barcode scanners and wireless printers along with square payment readers.

### Improves Sales Process

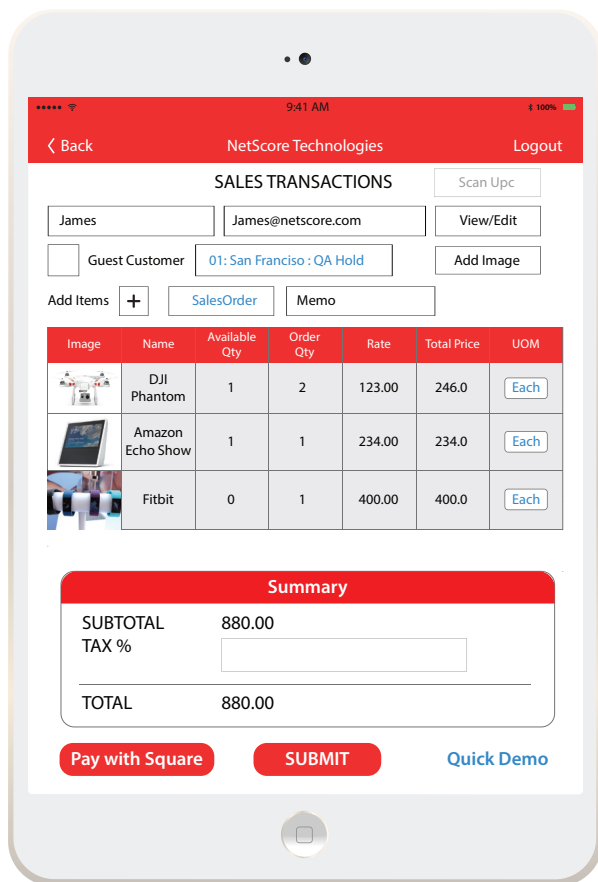

Sales transactions including payment capture can be created quickly. Eliminates manual payment event updates in NetSuite.

### Increases Employee Efficiency

Eliminates multiple manual steps and makes it a single step scanning process to improve both efficiency and productivity.

### Installs Quickly and Easily

Installs quickly from the Apple App Store and Google Play Store. Setup is easy and user-friendly. You will be up and running in minutes.

## Features

NetScore Trade Show Mobile works well in your retail store with a full complement of features that include:

### In-Store Operations

- **Item Lookup**

Delivers a complete overview of your inventory in real-time allowing constant visibility of stock levels and insights to improve purchasing decisions.

- **Sales Transactions**

Provides flexibility for quickly creating Estimates, Sales Orders, Invoices or Cash Sales on one screen. Also, supports payment options like Credit Cards, Debit Cards, Gift Cards, Apple Pay and Square Payments.

- **Customer Returns**

Performs customer returns with a one-step process in NetSuite.

- **Inventory Adjustment**

Rapidly adjusts inventory and sends adjustments through the approval process.

- **Inventory Transfers**

Transfers inventory from main location to trade show location in one step. After completion of trade show, the left over inventory can be reverted to main location.
