

TWW COMPREHENDS INVENTORY STRATEGY AND PROCEDURE

Totally Workwear is Australia's largest network of service providers in workwear and safety gear.

Challenge

TWW uses manual process for inventory items which is hindered and causing inventory dissimilitude. TWW wanted a customised solution for their standard process of receiving and shipping of inventory items. With Existing standard functionality, they were unable to track the inventory details and unravel issues in back orders and re-procuring of items.

Solution

NetScore WMS Mobile is customized for Bulk Receiving and Shipping based on their business process and optimized their inward and outward flow. Also, Inventory Count functionality in our App was very helpful to track and update the correct inventory bi-weekly. This inventory sync solved all their Back Order and Over Purchasing issues. Also, along with WMS solution we have also automated their Billing process based on Item Receipts quantities.

// *Working with NetScore we now have a warehouse solution that gives us a strategy and procedure that is easy to use, mobile friendly, extremely fast and intuitive. This system was up and running within hours across all our locations and with ease, the uncomplicated menu and access screens meant there was little need for staff training."*

Benefits

Strategic Approach

Using NetScore WMS app, TWW now have a warehouse solution that gives a strategy and procedure that is easy to use, mobile friendly, blistering and instinctual.

Ease of Access & Enhanced Systems

NetScore WMS app provided an instant solution has changed and enhanced their internal systems. Their system was up and running within hours across all locations and with ease. NetScore WMS app's uncomplicated menu and access screens meant there was little need for staff training, it's just that easy to use.
