

NetScore Jet Connector for NetSuite

Benefits

**Supports Various Types
and Variations of Product
Exports to Jet**

Items in NetSuite are exported to Jet. This makes it easier for the customer to update or create their product catalog in Jet

**Improves Real-time
Synchronization of Inventory
Levels and Pricing**

Levels of inventory in Jet are consistently updated with current levels of inventory in NetSuite. This ensures that orders placed in Jet are fulfilled

**Import Near Real-time
Jet Orders and Manage them
within NetSuite**

Easily imports all orders placed on Jet into NetSuite. A new customer is automatically created in NetSuite if a matching one is not found

**Streamlines Fulfillment
Process from NetSuite**

As orders in NetSuite are fulfilled, transactions of this fulfillment are automatically exported to Jet so that the customer has full visibility into current status of available orders

**Manage Cancellations, Returns
and Refunds within NetSuite
and Send Status Updates to Jet**

Easily tracks product return requests from customers and automatically updates tracking details from NetSuite to Jet

Features

Real-time Dashboard Analytics

Delivers real-time dashboard analytics for NetSuite enabling improved review of sales reports.

Exports Items from NetSuite to Jet

Items in NetSuite will be exported to Jet. This makes it easier for the customer to update or create their product catalog on Jet.

Export Levels of Price to Jet

Item prices in Jet are consistently and continuously updated with item rates from NetSuite. This reduces the tedious process of updating prices in both platforms.

Import Returns from Jet to NetSuite

Can easily track product return requests from customers and automatically update the tracking details from NetSuite and Jet.

Real-time Item Synchronization

Provides real-time item and inventory level synchronization between NetSuite and Jet.

Export Levels of Inventory to Jet

Item prices in Jet are consistently and continuously updated with the current levels of inventory in NetSuite. This ensures that orders placed on Jet are fulfilled.

Import Customers and Sales Orders

Easily import all orders placed in Jet into NetSuite. A new customer is automatically created in NetSuite if a matching one is not found.

Export Fulfillments to Jet

As orders in NetSuite are fulfilled, the transactions of this fulfillment are automatically exported to Jet so that the customer has full visibility about the current status of available orders.
