

NetScore Subscription Billing

For NetSuite

Built for
ORACLE
NETSUITE

Native SuiteApp

NetScore Subscription Management provides a powerful solution for companies who need to manage recurring sales order transactions. NetScore Subscription Management is built native to the NetSuite platform providing a seamless extension to the customer's ERP solution. The billing engine automatically creates incremental invoices to simplify the billing process. Entered as a single transaction, the subscription agreement defines the subscription item, frequency of the shipments / invoices, duration of the subscription, discounts, and payment methods.

“ NetScore Knows What They Are Doing!

Our company needed software to handle our recurring billing associated with subscription plans and I was lucky enough to come across NetScore. The software off the shelf met 90% of our needs, but they did a great job at customizing it to be exactly what we needed. Their engineers and support staff have been great to work with and I could not recommend them more! ”

MONNIT

Benefits

Increased Efficiency

Manages multiple transactions through a single subscription order. Easily manage repetitive sales transactions, fulfillment records and invoice generation.

Flexible Billing Options

User defined billing cycles, integrated credit card, and automated billing based on subscription terms makes billing quick and easy.

Automated Customer Communications

A variety of email communications can be triggered on events such as order and shipment confirmation, and invoice generation.

Easy Reporting

Leverage NetSuite reporting tools, dashboards, and saved searches, to keep up to date on your subscription orders.

Features

Trial Periods

Delays billing the customer for a designated number of billing cycles.

Pause & Resume Subscription

Ability to pause the subscription for a period and resume it on demand.

Customizable Solution

Add user defined fields, custom work flow, and reports using the power of NetSuite.

Full Integration with Financials

Leverages NetSuite financials for billing, revenue recognition, and financial reporting.

Discounts

Provide a discount on the entire subscription or provide an initial discount and change it after a designated number of transactions.

Add-On Charges

Add single charge items to your subscription order.

Auto Billing / Fulfillment

Automatically create invoices and fulfillment records on a defined billing schedule.

Reorder

Create a new subscription for the client with a single click of a button.

Dunning Management

Auto generate payment failure notices and payment reminders.

Website Integration

Generate subscriptions from your SCA built web site.
