

# NetScore ShipStation Connector

For NetSuite

NetScore ShipStation connector for NetSuite delivers a customized order fulfilment connector. This integration helps you automate order synchronization, track number upload and connect your online store with ShipStation warehouses around the globe.

NetScore ShipStation connector is completely customizable for all types of NetSuite stores. Installation includes integration and configuration to match your NetSuite environment.

## Benefits

### Real-time Order Import and Export

Real-time order import and export, will help the user to ship products faster and in an efficient manner.

### Real-time Dashboards

Real-time dashboards helps monitor sales and improve inventory decisions.

### Synchronizes Inventory and Price Levels

Real-time inventory and pricing level synchronization between NetSuite and ShipStation. This prevents the creation of overselling orders in the ShipStation.

### Error Handling Mechanism

Error handling mechanism improves ability to handle errors incurred during data transfers between NetSuite and ShipStation and vice-versa.

### Simplifies the Order Process with Complete Automation

- Complete automation of sales process
- Easy handling of orders and returns
- Built-in error handling mechanism

The screenshot shows the NetSuite interface for the ShipStation integration setup. The page title is "ShipStation integration Setup". The user is logged in as Swetha Ch, NetScore SDN Developer Account - Administrator. The page contains several input fields for configuration, including Name, Owner, Date Created, Last Modified, ShipStation API Key, ShipStation API Secret, Location, Subsidiary, Primary Customer, Warehouse, NetScore Licence Key, Days Remaining to Expire, Sales Orders Export, Order Folder, User, SS Store ID, and Department. There are also buttons for Save, Cancel, Reset, and Actions. Below the form is a section for Active Workflows, which currently shows "No records to show".
