

Are manual processes causing delays, errors, or lost data in your delivery and invoicing workflow?

Is poor system integration leading to miscommunication and inefficiencies between your sales and operation teams?

# NetScore Delivery Routing

For NetSuite

Built for  
**ORACLE**  
**NetSuite**

Hybrid SuiteApp

**SuiteSuccess Ready**

**NetScore Delivery Routing for NetSuite**, empowers businesses to streamline delivery operations with AI-driven route optimization, reducing errors and enhancing efficiency. Seamlessly integrated with NetSuite, it ensures a smoother, more reliable delivery experience, even offline.

With NetScore solution, we were able to capture a digital POD instantly. This reduced the time it took us to receive payment and improved cashflow tremendously. This also allowed our logistics team to analyze the NetScore routing Load Plan against the actual trip from our truck tracking software and reduce fuel costs significantly. The NetScore solution also reduced 95% of our printed paper and helped achieve our goal of a more environmentally friendly process. This was an easy to implement solution. The NetScore team has made several customizations to accommodate our business, such as Lat/Long delivery points, as well as physical addresses, unique to the oil & gas industry. I can't wait to see the next evolution of this product.

## Benefits

### Real-Time Proof of Delivery

Instantly captures delivery confirmations with digital signatures and photos, enhancing transparency and building customer trust.

### Boosted Delivery Efficiency

Maximizes deliveries per truck by utilizing AI-driven route planning, reducing fuel costs and driving distances.

### Improved Customer Satisfaction

Ensures reliable, on-time deliveries to boost customer satisfaction, retention, and repeat business.

### Reduced Labor & Training Costs

Automates tasks like route planning and proof-of-delivery, cutting down manual work and minimizing training expenses.

## Features

### AI-Powered Route Optimization

Use AI-powered route planning software to automatically map out the most efficient delivery routes, reducing travel time and fuel consumption.

### Semi-Offline Mode

Ensure continuous delivery operations with a semi-offline mode that stores data locally and syncs with NetSuite once internet connectivity is restored.

### Real-Time Proof of Delivery (POD)

Instantly upload digital signatures, photos, and delivery notes into NetSuite, providing real-time proof of delivery and eliminating paperwork.

### Driver Mobile App

Equip drivers with a mobile app for Android and iOS that features turn-by-turn navigation, real-time updates, and proof of delivery capture.

### Automated Invoicing

Automate billing by generating invoices in NetSuite based on completed deliveries, minimizing errors and manual data entry.

### Multi-Transaction Support

Simplify logistics management by handling item fulfillment, sales orders, customer returns, and purchase orders within the same transportation management system.

Safe Harbor Statement: The following is intended to outline our general product direction. It is intended for information purposes only and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for NetScore products remains at the sole discretion of NetScore Technologies.
