

NetScore QR & Barcode Generator

For NetSuite

NetScore QR & Barcode Generator for NetSuite offers the ability to generate custom labels for a variety of labeling / tagging scenarios. Labels can be generated based on both item and transaction records. This application allows you control the look and feel of the label including adding logos to personalize them to your business. Labels can be generated in bulk based on a user defined count or transactions such as the number of items to be received. Labels can be printed locally or emailed on demand.

Features

Supports Bulk Printing

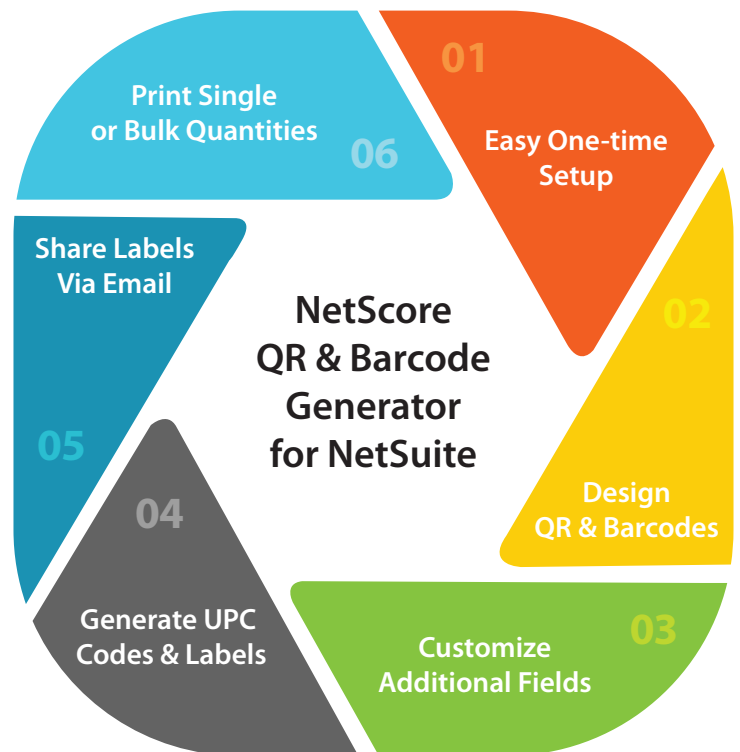

Labels can be printed both single & bulk quantities with visibility into quantity on hand information while generating them.

Supports Saved Searches

Items can be categorized using saved searches and labels can be printed accordingly based on saved search results.

Email Functionality

Gives you the flexibility to email the generated labels to designated recipients.

Auto Label Attachments to Item Records

Provision to auto attach generated labels to the Item record.

Benefits

- Labels based on items give you access to your entire item database in NetSuite.
- Labels can be printed via bar code printers or standard laser printers.
- The built for NetSuite solution is part of your NetSuite platform with no need to be concerned about maintaining separate databases and third-party products.
- Regular UPC Codes are generated using product codes, but NetScore QR & Barcode generator can create UPC codes even if the product codes are not available.
- If there are existing items with UPC Codes, our application will consider the existing UPC codes and will generate new UPC for new items.
- It supports small to giant manufacturers, organizations of any size can use our application for their products/businesses.
- NetScore QR & Barcode Generator is cost effective as it can be installed and run with less investment. The UPC Codes are very easy to design and decode, anyone can easily use them.
